

ProCSI 2011 – July 15, 2011 – Feedback

Tyron

Good: Going out to eat and bowling, hands on activities

Bad: Lectures were boring - too abstract

Sergis

Good: The environment, doing things together, the car simulation in Industrial Engineering

Bad: No challenge in the class. Nothing required, nothing challenging. The Sunday was slow.

Jon

Good: Lab tours were great, nuclear energy lab, soccer was good

Bad: make it two weeks, more hands on projects

Felix

Good: Liked hands-on activities

Bad: More on projects

Darkis

Good: Liked working

Bad: The modules were too abstract

Jamael

Good: Liked simulation of Hammad, liked Toby, the speech of the administration, staying together

Bad: Have a project of paper to show that they learned something

Jaimael

Good: The tours that showed what engineers do

Bad: Keep presentations simple. More hands-on projects, especially on science or how to write programs

Zack

Good: Free time was good; liked the evenings, being together. Especially liked days 3 & 4; hands-on projects in team and the plasma reactor

Bad: First days talks too boring & redundant

Crystal

Good: staying together, having fun, made new friends, group/team work

Bad: lectures: Overdid to the point where you are lost; break it into parts, give brief definition. Should have had more hands-on projects. Maybe have homework.

Jasmine

Good: Being together, having fun in evening; tours

Bad: More individual time. More than one television. Had problems understanding lectures.
